TECH STACK

FRONT-END CORE

- TypeScript
- React 19
- Next.js 15
- JavaScript ES6+

STYLING

- Tailwind CSS v4
- SCSS
- CSS Modules
- Framer Motion

STATE & DATA

- Redux
- Zustand
- TanStack Query
- Zod

TESTING

- Playwright
- Vitest
- Jest
- React Testing Library

BACK-END

- Node.js
- Express
- tRPC
- Prisma
- PostgreSQL
- MongoDB
- JWT
- Swagger

AI TOOLS

- Cursor
- Copilot
- Claude
- ChatGPT

INFRA & TOOLS

- Docker
- CI/CD
- REST
- GraphQL
- Vite
- Git
- Figma

LANGUAGES

- Ukrainian Native
- English B1

EDUCATION

M.Sc. Computer Science
Kyiv National University of
Construction and Architecture
2018 – 2019

B.Sc. Computer Science
Kyiv National University of
Construction and Architecture

Serhii Kuznetsov

Full-Stack Developer · React / Next.js / Node.js

Full-Stack Developer with 4.5+ years of commercial experience building scalable web applications using TypeScript, React, Next.js, and Node.js. Experienced in delivering end-to-end product features, from REST API design and backend services with Express.js to responsive, user-focused interfaces, with a strong focus on test coverage using Playwright, Vitest, and Jest. Proficient in leveraging AI-powered development tools such as Claude and ChatGPT to accelerate development, improve code quality, and streamline workflows. Passionate about performance optimization, accessibility, and building high-quality, well-tested products in collaborative, fast-paced environments.

WORK EXPERIENCE

- Amazon Agency
Front-End Developer
Nov 2024 – Aug 2026
 - Built front-end for automation tools that streamline Amazon ad campaign management across multiple client accounts
 - Improved Core Web Vitals (LCP, CLS, INP) on client dashboards — achieved measurably faster perceived load times through code splitting, lazy loading, and image optimization
 - Used Claude and ChatGPT to generate campaign performance summaries and ad copy suggestions integrated directly in the dashboard UI
 - Created interactive data-rich components — campaign charts, KPI tables, real-time budget trackers — using Chart.js and custom React hooks
 - Integrated Amazon Advertising and Product APIs; ensured WCAG 2.1 AA accessibility and full cross-browser compatibility
 - Wrote end-to-end test suites with Playwright covering critical dashboard flows, and unit/component tests with Vitest to prevent regressions across releases
- Peiko
Full-Stack Developer
Jan 2021 – Oct 2024
 - Developed responsive and accessible web applications using React, Next.js, and TypeScript with a mobile-first approach
 - Built reusable UI components and design systems with SCSS and Framer Motion, improving development consistency across projects
 - Implemented efficient state management using Zustand, optimizing application performance and scalability
 - Designed and built REST APIs with Node.js and Express.js, following MVC architecture for clear separation of routes, controllers, and services
 - Implemented JWT authentication and custom middleware for request validation, logging, and centralized error handling
 - Added file upload endpoints with Multer and documented all endpoints with Swagger for easier front-end/back-end collaboration
 - Collaborated closely with designers and back-end developers to deliver high-quality features and maintain code quality through peer reviews
 - Covered shared UI components and utility logic with Jest and Vitest unit tests, raising confidence in refactors and reducing regressions before release
